Mr. Doug Davidson
Metro Water Filter
103 Harmony Crossing
Suite 5
Eatonton, GA 31024

Dear Doug:

My wife and I are owners at the Village at Lake Club Pointe. We were told when we purchased our three bedroom unit that we might want to consider installing a water softening system due to the high mineral content of the water. We chose to wait before investigating water softening systems due to other start up expenses at the time.

Over the next 12 months, we began to notice several water related abnormalities such as spots and streaks on dishes/glasses, offensive odor emanating from hot water faucets and rust residue around joints. After speaking with a number of people who had already purchased systems, we decided to give MWF a call. After explaining our water concerns to Doug Davidson, he assured us that one of their systems would eliminate the issues that concerned us. Doug sensed we were skeptical about spending over a thousand dollars for something we were not sure would work. He offered to install the system and suspend any payment until we were satisfied with the results.

Needless to say, we were completely satisfied with the MWF system. We no longer experienced spots and streaks on dishes/glasses washed in the dishwasher. The odor was gone from the hot water faucets. We were pleased to learn that we actually needed less soap in the washer, dishwasher and showers due to the softness of the water. We have not noticed the residue around joints since we installed the system.

We recommend Doug Davidson and his team of professionally trained technicians. They have been very courteous and responsive to work with and do what they say they will do.

Best regards,

Penny and Randy Gurley
